

Local Roads

Sixty-four percent of all roads in Pennsylvania are maintained at the local level. The local roadway system is a mix of state and local roads in almost every community. Statewide state roads include Routes 1, 3, 10, 15, 30, 322, 422, as well as many others. The responsibility of local governments is to maintain and plow the thousands of connector roads that lead to these inter-county routes and our interstate system of highways.
